

**BALLISTIC PROTECTION**

# SidePRO-KE/IED

SidePRO-KE/IED as solution for wheeled vehicles

Blast trials with artillery grenade

**➤ DESCRIPTION**

SidePRO-KE/IED is a polyvalent composite protection system. The patented production process enables the system to counter AP-projectiles, IED, artillery fragments and EFPs with a minimum thickness.

## ➤ PROTECTION TECHNOLOGY

Composite add on protection for armoured platforms

Passive armour against KE, IED and EFP threats

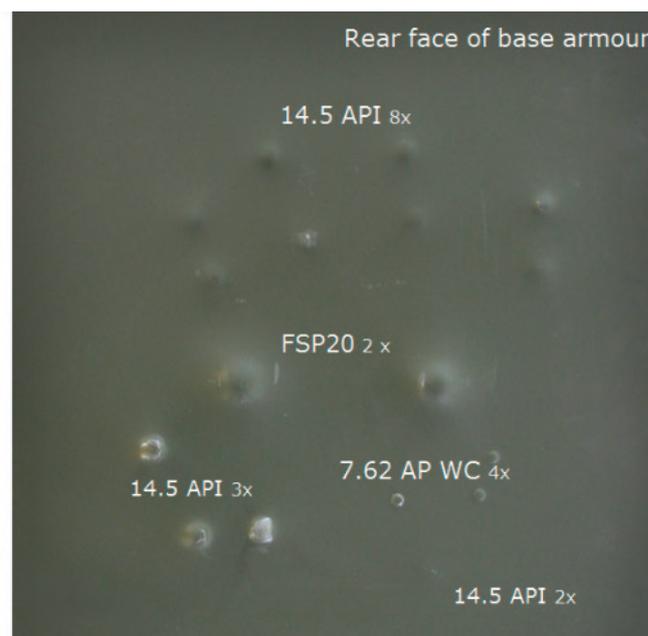

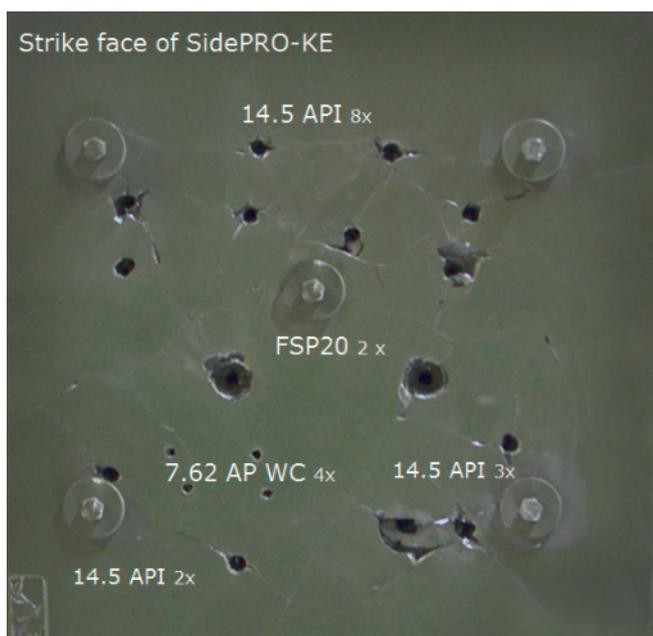

## ➤ TECHNICAL CHARACTERISTICS

For base armour 7 mm upwards

Adaptable to any contour and shape

Multi-hit capability exceeds international standards

Low thickness enables integration behind tracks and wheels

## ➤ BALLISTIC VERIFICATION

- Up to 14.5x114 API B32
- High speed IED fragments
- Blast
